WORK EXPERIENCE

Outlier AI

Aug. 2025 – Feb. 2026

Software Developer

Remote

- [Outlier](#) is a platform where subject matter experts refine artificial intelligence models.
- Ideation, system design, & product-focused engineering leadership for Outlier's AI Platform.
 - **Stack:** React & TypeScript; Node.js, PHP, Python; Ubuntu, Nginx; OpenAI, Anthropic; Cloud-Based Infrastructure.

Magellan AI

Jan. 2025 – Aug. 2025

Software Developer

Remote

- [Magellan](#) is a podcast advertising platform with the largest database of podcast ad data in the market, tracking ads across 50,000+ shows and thousands of brands used by advertisers managing massive media budgets.
- As a software developer, I helped build and train the models behind Magellan's ad detection and classification, and that work directly improved the accuracy of the data that customers depend on to trust the platform.
 - Automated audio review workflows, cutting manual QA time by over 400 hours per quarter.
 - Shipped core model and infrastructure updates that scaled with a 30% increase in podcast coverage.
 - **Stack:** Python, PyTorch, and Cloud Services.

Kreative Media

Mar. 2024 – Dec. 2025

Lead Engineer

Remote

- Led development and execution of integrated digital campaigns across SEO, paid media, content, and web channels to boost client visibility and conversions.
- Drove measurable growth for 30+ clients by optimizing multi-channel strategies, contributing to average 25%+ quarter-over-quarter traffic increases and 15% lift in lead generation, while streamlining reporting and campaign workflows.

Sound LLC

Aug. 2023 – Mar. 2024

Cyber-Security Specialist/Backend Engineer

Remote

Big Human

Jan. 2023 – Mar. 2023

Frontend Engineer

Remote

NetBlazr

Oct. 2022 – Dec. 2022
